

Clinical Examination Station 8

9 minutes with up to 1 minute for feedback

You are a surgical SHO in outpatients and your consultant has asked you to examine this patient and present your findings. You will then be asked some questions regarding the management. Below is the referral letter:

The GP Practice

Drs G Jones and S Williams
17 High Street

The Consultant Surgeon
St Vincent's Hospital
Pintown

Re: DP

Dear Doctor

Could you please see this gentleman with torturous swellings in both legs and some discolouration of the skin on his lower leg.

Yours sincerely

Simon Williams

Varicose Vein examination

Performs an appropriate examination of the patient including offering to perform or performing Trendelenberg or tourniquet tests. Presents findings in a comprehensive and succinct manner.

Answers two or three questions relevant to the patient.

e.g. What is the diagnosis? What are the management options? What pre-operative investigation is indicated?
