

## **Pathology Station 1**

**9 minutes with up to 1 minute for feedback**

**In this station you will be presented with a series of pathological specimens and/or photographs of pathological specimens. You will be required to describe the specimen in pathological terms, offer a suggested diagnosis or differential diagnosis, and will then be asked a series of follow-up questions on the specimen.**

## Pathology Station 1

- Describes pathological specimens accurately using pathological terms
- Correctly identifies pathological process represented
- Answers questions in a manner demonstrating a comprehensive understanding of the pathological processes presented
